EDUCATION

SRM Institute of Science and Technology, Kattankulathur <i>B.Tech in Computer Science and Engineering</i>	Chennai, India 2027	CGPA: 9.13/10
Holy Mission Senior Secondary School, Patna <i>Class XII, CBSE</i>	Patna, India 2020	Percentage: 92.2%
Ishan International Girls School, Patna <i>Class X, CBSE</i>	Patna, India 2018	Percentage: 91.4%

EXPERIENCE

Web Development Intern – RCOTBA Group of Industries <i>Remote</i>	<i>Aug 2025 – Present</i>
- Developed responsive, cross-browser web pages using HTML, CSS and JavaScript as part of the frontend team. - Collaborated with the team to implement UI components and improve overall user experience.	
Web Development Intern – Accenture <i>Remote</i>	<i>Jul 2025 – Oct 2025</i>
- Built and styled web pages with HTML/CSS/JS, following best practices for clean and maintainable code. - Gained exposure to real-world frontend workflows and code review practices.	
Web Development Intern – Vault of Codes <i>Remote</i>	<i>Oct 2025 – Nov 2025</i>
- Completed a hands-on one-month program focused on core frontend development fundamentals. - Strengthened skills in problem solving, debugging and responsive design.	

PROJECTS

AI Resume Screening & Candidate Evaluation Platform <i>React.js, Node.js, Express.js, MongoDB</i>	github.com/harshita-singh2106/AI-Resume-Screening
- Built a full-stack platform that parses resumes, extracts candidate skills and auto-scores applicants. - Designed REST APIs and MongoDB schema to support real-time evaluation and ranking of multiple candidates. - Implemented secure authentication and optimized queries, reducing response time by 40%.	
Code Plagiarism & Similarity Detection System <i>Python, AST Parsing, Flask</i>	github.com/harshita-singh2106/code-plagiarism-detector
- Developed a similarity-detection engine for Python/C++ using AST-based structural comparison. - Applied semantic logic to detect logically-equivalent code, reducing false positives by 40%.	
Landslide Detection using Machine Learning <i>Python, TensorFlow, CNN, OpenCV</i>	github.com/harshita-singh2106/landslide-detection-ml
- Built a CNN-based image classification pipeline to identify landslide-prone terrain with 92% accuracy. - Processed satellite/terrain imagery using OpenCV and NumPy for feature extraction and model input.	

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL
Frontend: HTML, CSS, React.js
Backend: Node.js, Express.js, REST APIs
Database: MongoDB, MySQL
Tools & Platforms: Git, GitHub, Docker, VS Code, Postman
Machine Learning: TensorFlow, Scikit-learn, OpenCV, Pandas, NumPy
CS Fundamentals: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS

- CGPA of 9.13/10 in B.Tech CSE at SRM IST.
- Volunteered as an educator with Be for Nation (Trust) under the SHARP MIND initiative, simplifying concepts for young learners and strengthening communication and mentoring skills.
